A WEALTH OF KNOWLEDGE AT YOUR FINGERTIPS

In today's competitive marketplace, organizations must focus scarce resources on the strategies most likely to yield success. SAS software can help you achieve this focus.

SAS leverages the investments you've already made in operational systems and applications by adding a layer of intelligence you can't get anywhere else. Here, from one source, is everything you need to implement a complete intelligence strategy throughout your enterprise. Unlike vendors who can only offer disconnected point solutions, SAS brings you a complete suite of award-winning data management and analytical software designed to give you the ultimate reward: *The Power to Know®*.
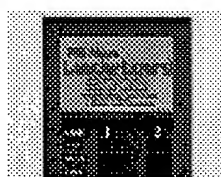

Whether you need software that is tailored for your industry, a solution that addresses a focused business challenge or specific technology to strengthen your enterprise intelligence infrastructure, SAS offers the right tool for the job. *To learn more about how SAS software can meet your unique needs, explore the highlighted items below and browse the menu to the left.*
